The illustrations may show accessories and items of optional equipment which are not part of standard specifications. Colours may vary slightly from those shown, owing to printing process.

Journeys that create
beautiful memories

Starbus SKOOL
Safety and comfort everyday

Happiness unlimited

What does it take to bring joy to a child's life? A toy? A pet? A visit to an amusement park? Or just a moment of happiness? Tata Motors assures many happy moments with **Starbus Skool** - a range of school buses that carries children with utmost comfort and safety, all the way to school and back.

As you read on, you'll discover what makes the Starbus Skool range an ideal means of transport for your children.

For the Indian. By the Indian.

Most of the time, children in India are made to travel to school in buses that are primarily made for public transport. This reason made Tata Motors launch Starbus Skool - a range of buses purpose-built for children and indigenously designed for travel conditions in India.

The range, available in AC and non-AC versions, incorporates **25 safe, stylish and stress-free features** that ensure optimal safety and comfortable rides for your children. These features adhere to recommended Government guidelines, thereby ensuring safety for school children.

Safety and Comfort every day

25

SAFE, STYLISH AND STRESS-FREE

FEATURES

Each Starbus Skool is aesthetically designed and equipped with special 'child-safety' features that provide comfort, convenience and protection to the children travelling in it.

1

Fluorescent exterior
The bright golden yellow exterior of the bus enhances visibility.

2

School bus logo
The prominent logo helps other drivers identify the school bus from afar and drive carefully around it.

Anti-skid flooring
The easily washable flooring has an anti-skid surface that prevents children from slipping, even when the surface is wet.

3

4

STOP sign

The bright luminescent 'STOP' sign on the door acts as a caution to other drivers while the children board or alight from the bus.

5

First-aid kit

The kit contains essential medical supplies to handle minor injuries that may occur during transportation.

6

Fire extinguisher

As per Tata Motors' safety guidelines, the Starbus Skool range has fire extinguishers that are handy in times of emergency, to ensure safety.

7

Safe upholstery

All Starbus Skool buses have fire retardant material for their upholstery. This means more safety for the children travelling in them.

8

Lowered step

The retractable lower first step allows children to board and alight from the bus with minimum effort and risk of injury.

9

Childcare seats
The ergonomically designed seats ensure that children enjoy a comfortable ride to and from school.

10

Armrest

Each armrest is padded, to prevent injuries from sharp edges. (Available on front seats only)

11

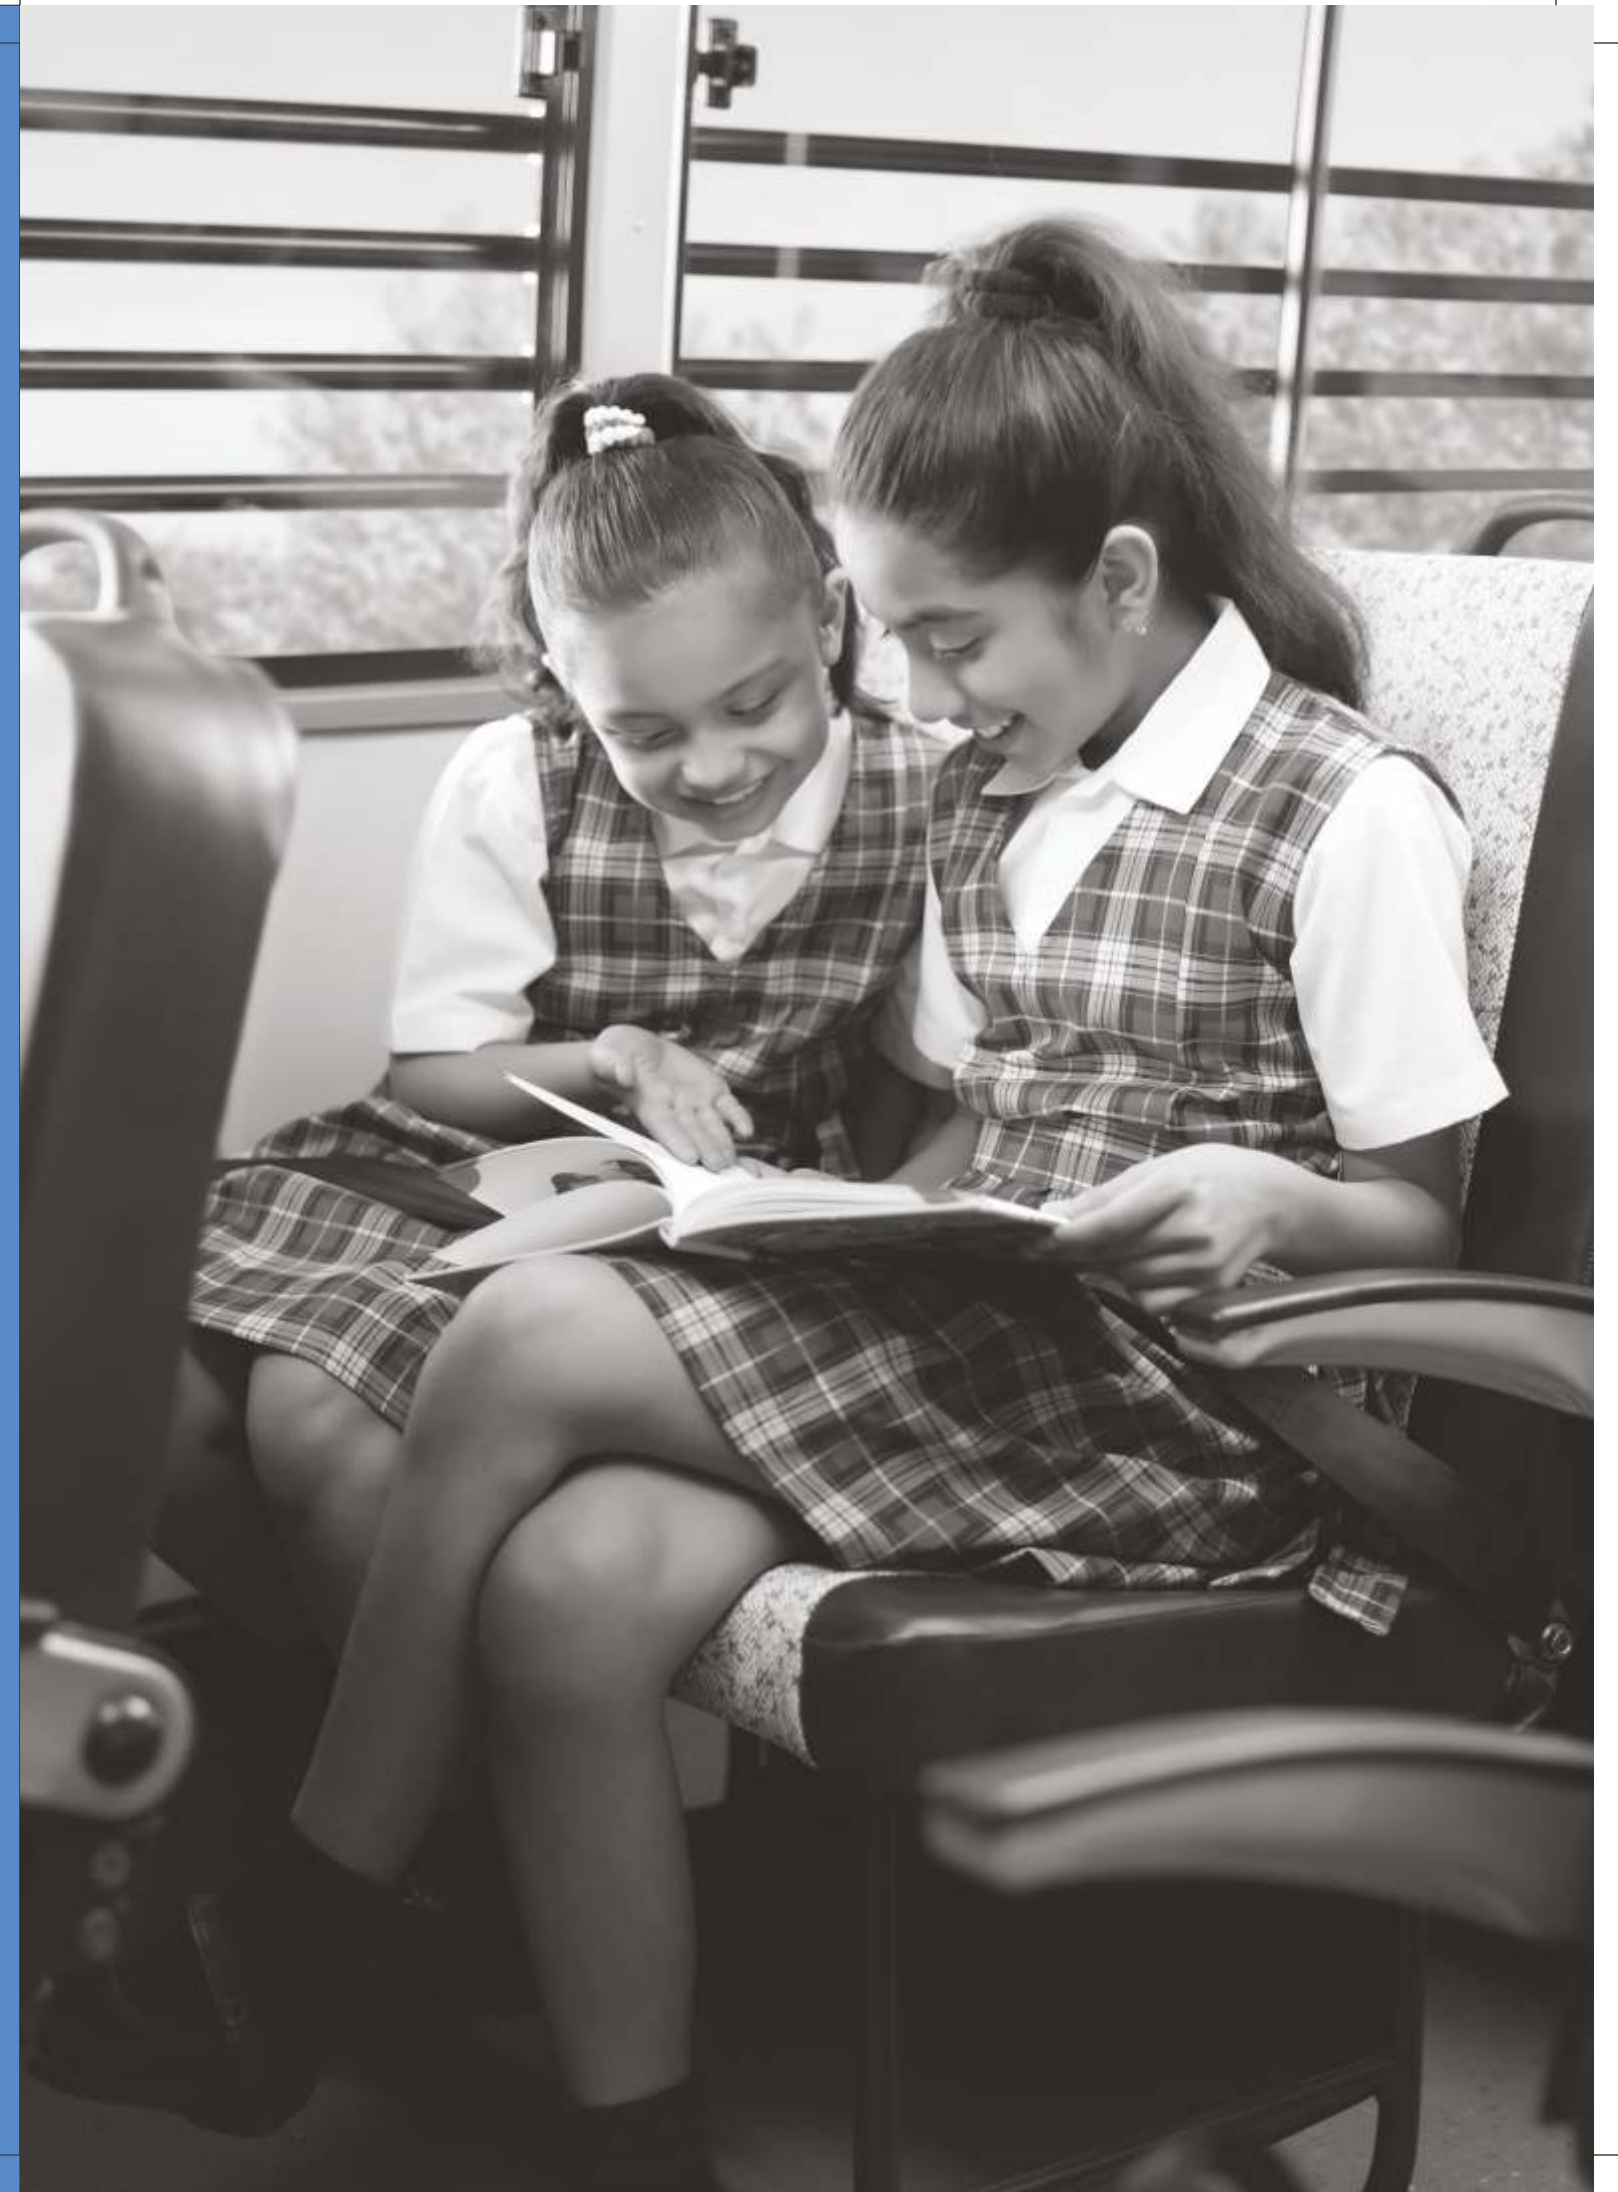

Tooth guard

The rigid top of the seat is covered with additional padding to protect children from hurting their teeth.

12

Shoulder comfort

Special racks below the seats provide convenience for children to keep their school bags without dirtying them.

14

Hat-rack
 Apart from special racks, these buses also have hat-racks for extra space and shoulder comfort. (Tubular hat-racks in non-AC buses and modular hat-racks in AC buses)

Bottle-holder
 The embedded hooks allow children to hang their water bottles.

16

Collapsible handles
 The handles provide support to the children when the bus turns or stops suddenly.

Grab handle
 A soft grab handle on the outer edge of each seat helps children get a better grip while walking along the aisle.

17

Spacious windows
 The extra large windows allow sunlight and fresh air into the bus.

13

15

18

Guide rails

Guide rails on the roof with grab strap handles provide children with a better grip inside the bus. (Available only in non-AC buses. In AC buses, this feature is integrated with the hatrack)

19

Padded windows

The soft padding prevents the possibility of injury while the children enjoy a pleasant view of the surroundings.

20

Window guardrails

The three guardrails on windows ensure added security for children.

21

Guarded driver saloon

The tubular guardrail separates the driver's cabin from the passenger area, thereby preventing driver distraction.

22

Door alarm

A warning alarm alerts the driver in case any door is left open.

23

STOP switches

In case of an emergency or an unscheduled halt, the children can press the STOP switch located on every window pane, to alert the driver to halt. (STOP switch is on the Stanchion Rod near the door in 16 to 40-seater buses)

24

Emergency exits

The rear windshield, made of breakable glass, and rear emergency door both ensure a large and effective space for evacuation of children, in case of an emergency. A hammer has been provided, for easy breakage of the rear windshield glass.

25

Individual seat lap-belts

All the AC versions of Starbus Skool offer individual seat lap-belts on front seats for added safety.

Safety for the 'Man in Control' A special driver's work area

An experienced, relaxed and undisturbed driver is the best safety measure in any vehicle. That's why every Starbus Skool is designed to help the driver stay focused and drive safely. The driver area is provided with a tubular, latched, swing type guardrail that offers a comfortable work area for the driver. The driver's seat is equipped with a 2-way adjustable, reclining facility and is provided with a seat belt. The clear layout of instruments ensures easy operation of controls, while the one-piece windshield gives the driver an unobstructed view of the road.

Tata Bus Terminus: A single source for a range of services

Now you can avoid the hassles of interacting with multiple vendors and agencies in building a bus, and subsequent servicing of the body and chassis. Tata Motors, with its fully-built range of buses, offers a one-stop solution for bus buyers - the Tata Bus Terminus.

Tata Bus Terminus services include:

Easy finance schemes that facilitate easy purchase of your desired Starbus Skool.

A range of fully-built buses to choose from, along with spares and accessories, not only for the chassis but also for the complete bus.

Attractive annual maintenance contract, which includes repair services, overall maintenance, genuine spares and breakdown services for the bus.

A 36-month/3,00,000 km warranty based on model categories, which includes a 6-month warranty on paint peel-off and blistering.

The Sampoorna Seva Package provides maintenance facilities, including repair services, overall maintenance, genuine spares and breakdown services for the bus.

A nationwide service network enables you to access our nearest service partners, Tata Motors channel partners or Tata Motors branches conveniently, wherever you are.

Toll-free Customer Care assists you on any of our products. You can call us at 1800 209 7979, anytime between 9:30 am and 6:00 pm, Monday to Saturday. Our executives will be glad to answer your queries and provide you with the latest information. Alternately, you may email us at businfo@tatomotors.com or visit www.buses.tatomotors.com

You may also walk into any of our four regional offices, area offices or dealer branches across the country. Call our 24-hour Customer Service Helpline at 1800 209 7979 for more details.
